The Bentley Developer Network: Your framework for innovation

The Bentley Developer Network (BDN) invites developers to join a mission-driven ecosystem dedicated to advancing the world's infrastructure. At its core, the program allows for innovation and collaboration, as well as a commitment to fostering a thriving community of innovators and problem-solvers. By providing the necessary tools and platforms, Bentley empowers developers to apply their creativity to real-world challenges, create powerful solutions that directly address user needs, and contribute to a sustainable global economy and better quality of life. This program is a collaborative effort, recognizing that empowering the developer community is fundamental to enabling the next wave of innovation in the infrastructure sector.

Leveraging Bentley's platform technologies through the program can help you streamline the

entire software development lifecycle. Our platforms take away the complexities of the underlying technology, empowering you to focus on your core competency: writing code and building valuable applications. This approach not only boosts efficiency and accelerates your time-to-market, but also reduces operational costs while enhancing scalability, reliability, and security.

Whether your goal is to build an in-house application to optimize a specific workflow or to launch a market-ready commercial product, the program provides the extensive access to tools, services, and support you need. By joining the BDN program, you'll help advance global infrastructure while meeting the evolving needs of our users and industry. You will drive significant value, allowing your business to scale faster and more securely than ever before.

The Bentley Developer Network program journey

Gain an exclusive access advantage

Kickstart your journey with direct access to Bentley's platform technologies, comprehensive documentation, and dedicated technical support.

Accelerate innovation

Leverage these premium capabilities to build and deploy faster while developing high-quality applications more efficiently than ever before.

Expand your network

Join a vibrant, collaborative community of developers and industry experts to share knowledge and unlock new opportunities.

Enhance your brand credibility

Build trust by aligning with a global technology leader and gain immediate market visibility by featuring your solutions in the Bentley Ecosystem Catalog.

Scale your business

Partner with a program purpose-built to support and accelerate your organization's long-term growth, from startup to enterprise.

Harness the power of our technology

Bentley products are the starting point. Our platform technology is how you deliver the complete solution. It provides the essential integration layers—the tools, APIs, and SDKs that allow you to adapt our technology to the unique needs of any organization.

The BDN program empowers you to build custom features and functionalities that solve the unique “last-mile” connectivity requirements.

With the program resources, you can:

- Automate processes to boost efficiency.
- Integrate with other business-critical software for a unified workflow.
- Customize the user experience to deliver maximum value.

By building on top of our platform, you can transform a powerful foundation into a bespoke solution that solves your users’ most critical challenges.

Program benefits

The BDN program offers all the resources you need to accelerate innovation and connect with a world-class ecosystem.

Technology and tools

- **Software development kits (SDKs):** Get access to our comprehensive SDKs, which include the [Application Programming Interfaces \(APIs\)](#), necessary libraries, sample code, and support files you need to build powerful applications with greater ease.
- **Application programming interfaces:** Leverage a wide range of Bentley product APIs to build seamless integrations and extend the capabilities of our core technologies.
- **Development licenses:** Gain access to Bentley products and utilize licenses for non-production purposes, ensuring you have the right tools for development and testing.
- **Additional documentation:** Access supporting documentation, including API references and SDK guides as an additional resource that ensures you have information needed to integrate, build, and extend Bentley technologies.

On-demand learning

Accelerate your development journey and stay ahead of the curve with our comprehensive training resources, delivered through your centralized learning hub: [The Bentley LEARN portal](#).

Our curated learning paths provide a structured, self-paced experience designed to shorten the learning curve and help you master fundamental concepts- anytime and anyplace.

Through our powerful Bentley LEARN portal, we provide flexible, on-demand learning designed especially for you:

- **Onboarding new developers:** The portal provides a way to get new team members up-to-speed on Bentley products, APIs, and SDKs quickly.
- **Upskilling existing teams:** It offers a convenient way for experienced developers to explore new technologies and stay current with the latest API and SDK releases.

Discover our training resources through the Bentley LEARN portal, such as:

- **On-demand:**
 - [MicroStation CONNECT developer training](#)
 - [MicroStation VBA for advanced users](#)
 - [Introduction to the MicroStation Python Editor](#)

Expert support

- **Urgent technical support:** The [Bentley Support Portal](#) provides the option to file a ticket and engage for urgent technical support on a specific case.
- **Dedicated developer support:** Partner with our expert developer support team. We collaborate with you through discovery sessions, solution architecture design, and one-on-one engineering sessions to help you overcome programming challenges and optimize your solutions.

Community and connection

- **Exclusive [Developers and Programming Resource Center](#) access:** Join the dedicated Bentley Developer Network and other product communities. These forums allow you to connect with peers, share knowledge, and engage directly with Bentley experts to solve problems and drive innovation.

From development to market: Promote your solutions on the Bentley Ecosystem Catalog

The Bentley Developer Network empowers you to not only create powerful, customized solutions using our extensive SDKs and APIs, but also to grow your business. We are committed to helping you realize a clear return on your investment by providing tangible marketing and business opportunities.

Once your application is ready, the Bentley Ecosystem Catalog becomes your gateway to a global audience. It serves a clear purpose: to help users find, evaluate, and connect with solutions that support their infrastructure projects. You can add and browse solutions by categorizing them into specific areas, such as solution type, platform category, lifecycle phase, and sustainability impact.

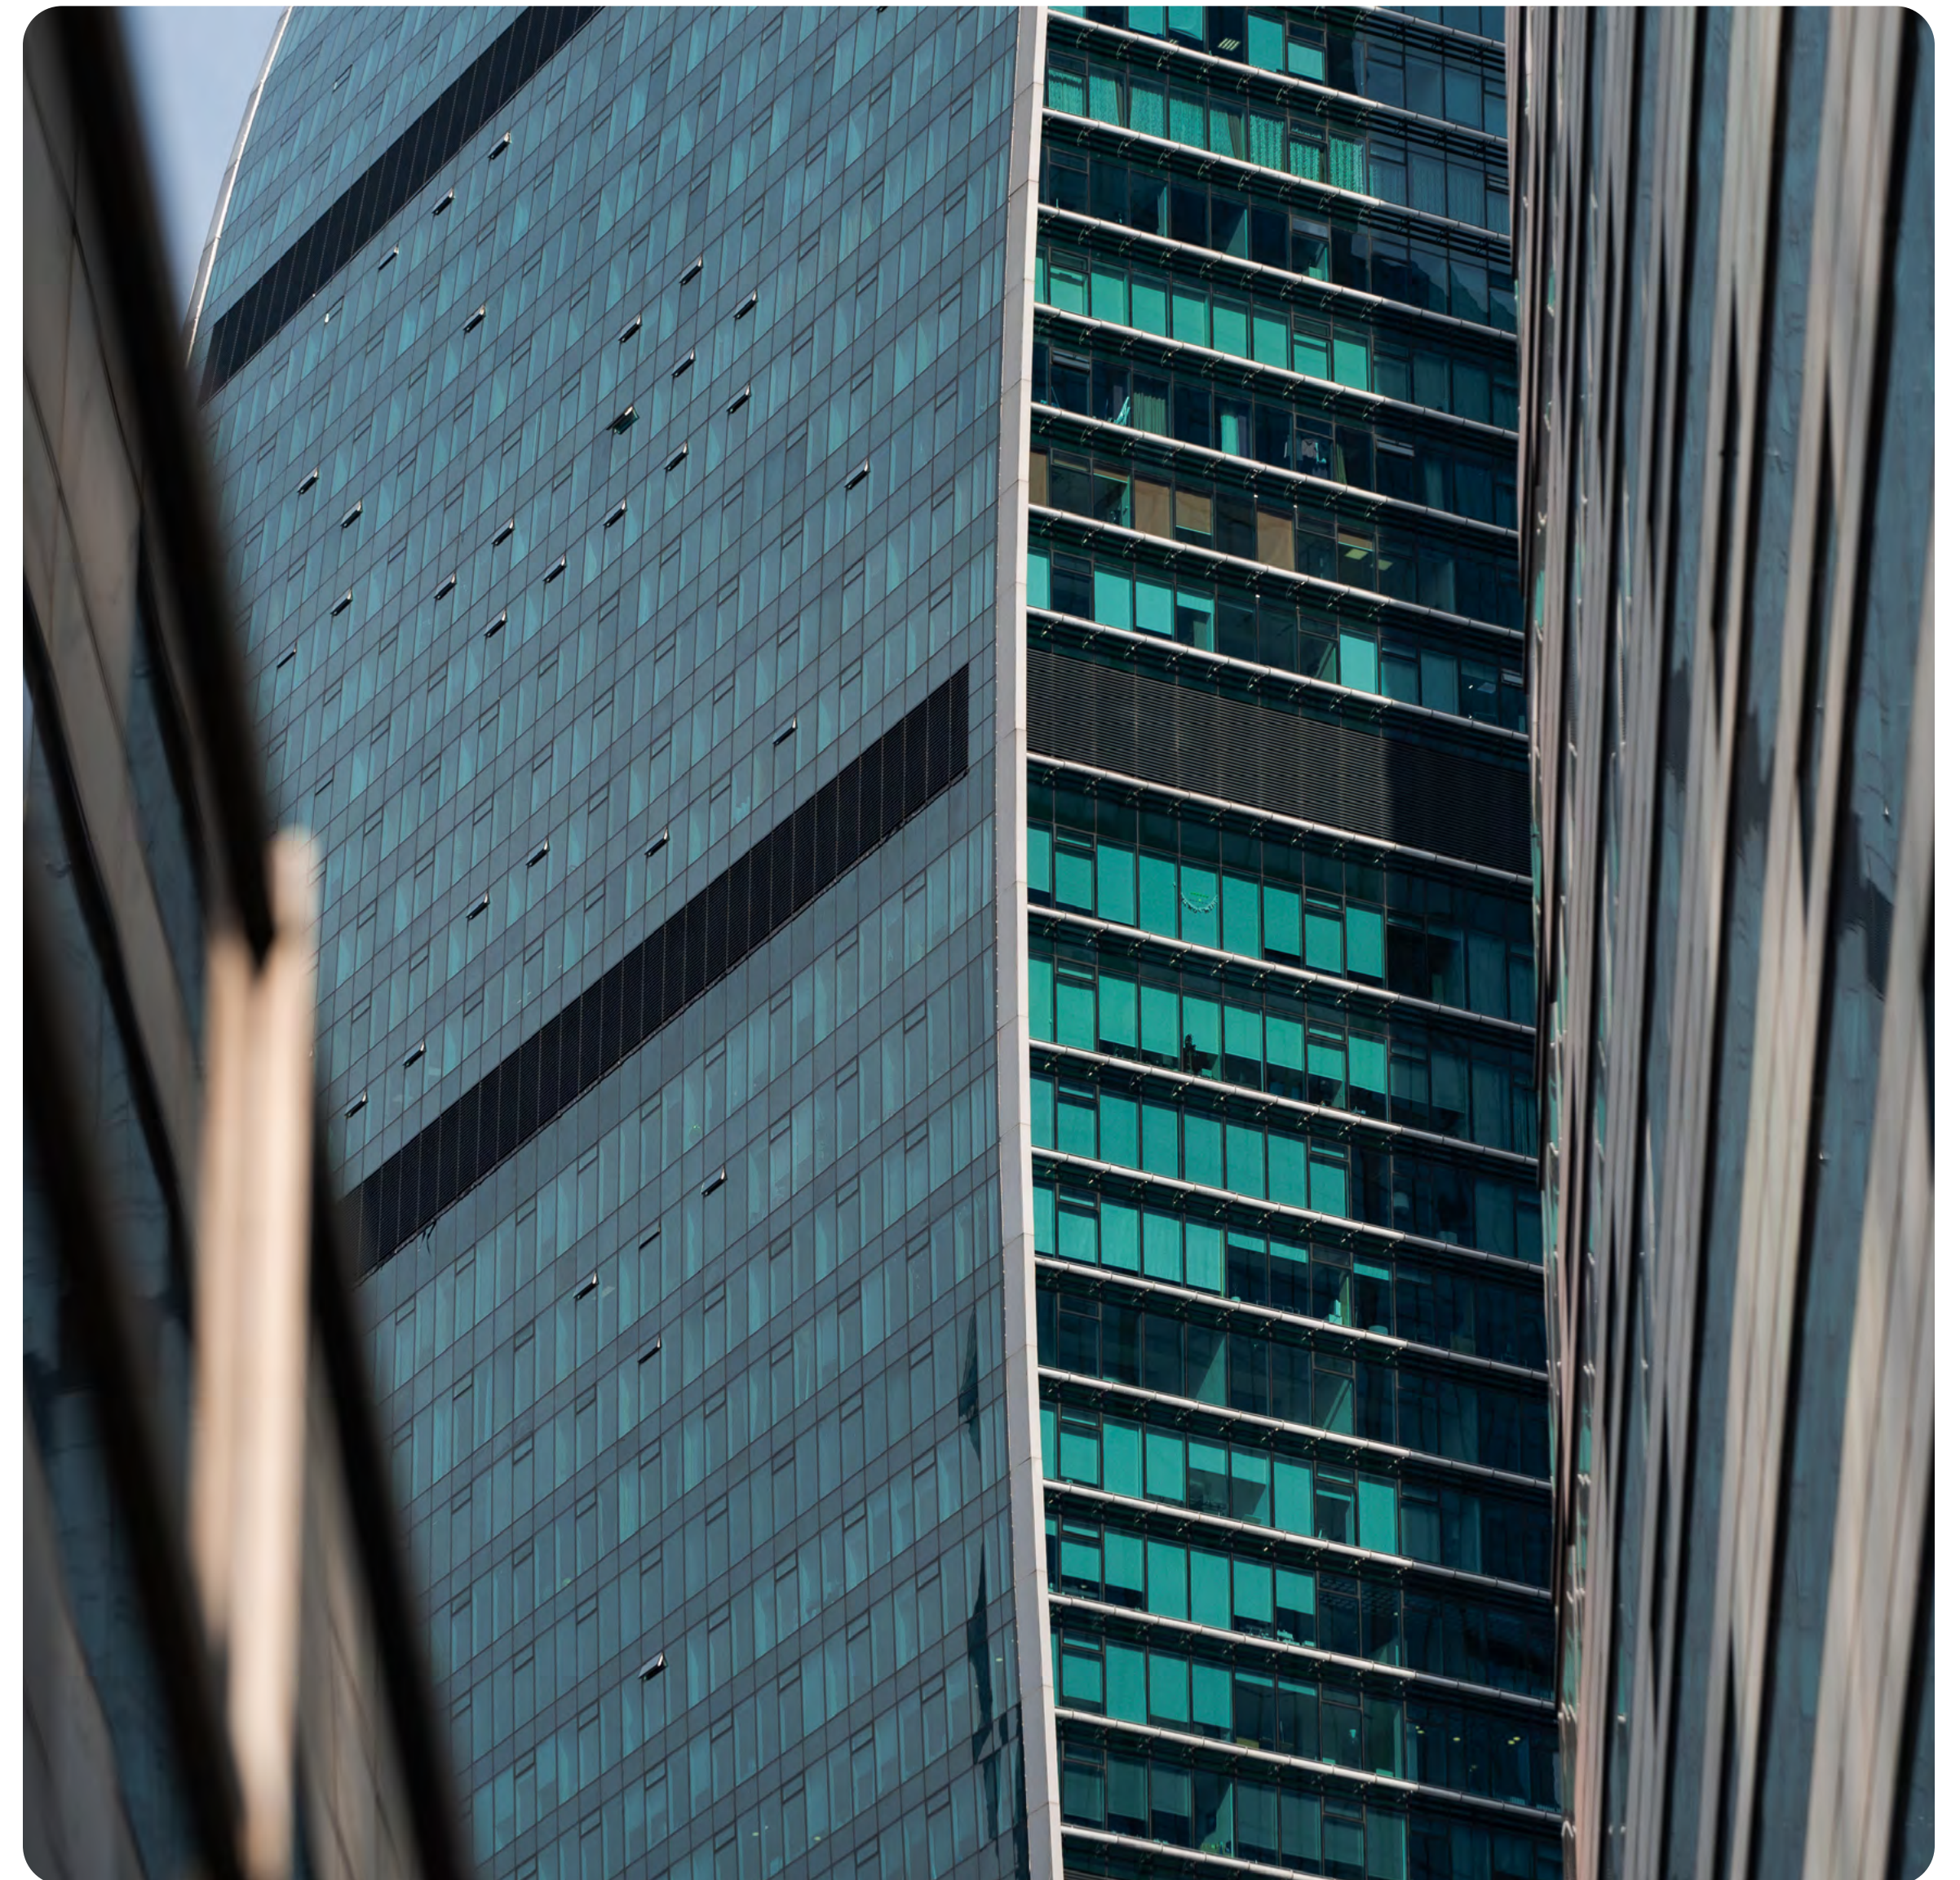

This catalog connects Bentley's vast user base with innovative, third-party solutions, just like yours. By listing your

application, you gain visibility and position your solution as a valuable extension of the Bentley portfolio, helping you generate new leads and drive business growth.

Our [Partner Spotlight](#) series is yet another strong platform to promote joint partner success stories from around the world. It highlights how, together, we are shaping the future of infrastructure, developing innovative solutions, and tackling global challenges.
