BRING CALM TO THE CHAOS

Gain insight into your infrastructure’s health, project activity, and critical data with SPIDA® studio.

Managing overhead utility asset data, day-to-day activities, infrastructure projects, inspection data, and reporting can be overwhelming, overly complicated, and can often feel like chaos within an organization. Data often resides in different systems, in various formats and is collected by third-party field crews using disconnected and non-integrated inspection tools. Luckily, there is a straightforward solution. Bring calm to the chaos with secure, structured, and automated asset management with SPIDAstudio - the industry leading cloud-based platform for asset owners and contractors.

Breaking away from often antiquated and time-consuming methods of retaining asset data information and make-ready engineering, SPIDAstudio’s platform consists of three robust and affordable levels of functionality.

SEAMLESSLY INTEGRATE WITH SPIDAcalc

AUTOMATE PROJECTS WITH CONFIGURABLE WORKFLOWS

VISUALIZE ASSETS AND PROJECTS IN MAP VIEW
**SPIDA® studio empowers asset owners, telecommunication companies and contractors to manage the physical health and activities occurring on their overhead systems.**

- **Design Manager** organizes and manages your SPIAdaCalc pole designs while gaining central access to pole loading analysis results.
- **Process Manager** centralizes your organization’s projects and programs with workflow automation.
- **Enterprise** connects your GIS, ERP, asset management, CIS, Mobile Workforce, and other systems.

```
"The flexibility built into SPIAdaCalc has helped us modify work processes, and adapt to new technology like small cells. It has enabled us to integrate with our mapping and work management systems to automate tedious tasks, and cut down on data entry issues."

-Senior Engineer
```
IMPLEMENTATION MADE SIMPLE
Users work with a dedicated and experienced implementation team, who will guide you through the implementation process. From user setup to hands-on training, SPIDA makes getting started simple.

SCALABLE DEPLOYMENT
SPIDA studio can be quickly deployed and scaled to fit your needs. Whether you need help with a specific project or for ongoing programs, SPIDA studio provides immediate and long-term flexibility to support organizational growth.

INTUITIVE, FLEXIBLE INTERFACE
Use the Dashboard to view key metrics at a glance, and seamlessly navigate between Map, Detail, and Table Views to manage, prioritize, and organize workloads easier than ever before.

ROBUST REPORTING
SPIDA studio features predefined and configurable reporting and analytic tools that simplify complex data. Joint use coordinators can efficiently monitor business processes at a glance, enabling them to make real-time, data-driven decisions.

OUT-OF-THE-BOX SOLUTION
As a cloud-based platform SPIDA studio, was designed to be straightforward and efficient. Configure your own or pick from a set of prebuilt workflows, including One Touch Make Ready and Pole Transfers, to immediately manage and automate your processes.

INTER-DEPARTMENT COORDINATION
Use SPIDA studio across multiple departments, including contractors and outside agencies to ensure everyone is on the same page with real time access to project updates and asset details.

REAL-TIME COMMUNICATION
Streamline the process of sharing data and information between individuals and organizations with real-time notifications and alerts, keeping stakeholders informed and simplifying the coordination of high priority projects.

ENHANCED SECURITY
SPIDA studio supports SAML SSO and features next-gen intrusion detection systems, an on-demand virus and malware scanning engine, and centralized off-host logging and alerting. All data is encrypted at rest and in transit to protect customer data.

SYSTEM INTEGRATION
Integrate SPIDA studio with existing enterprise systems and reporting tools such as GIS and work management systems. A robust set of public APIs, webhooks, and customer integration options are available.

HISTORICAL PROJECT TRACKING
Centrally store all project documentation, SPIDA calc designs, and images. Extensive project logs, convenient access to all past projects, and project documentation ensures you will never lose sight of the past with SPIDA studio.
