

Bentley Systems Signs MoU with College of Engineering Trivandrum to Advance Digital Infrastructure Skills in India

Collaboration designed to strengthen industry-academia engagement, enhance experiential learning, and develop future-ready infrastructure engineers

THIRUVANANTHAPURAM, February 10, 2026 – [Bentley Systems, Incorporated](#) (Nasdaq: BSY), a global leader in infrastructure engineering software, announced today that it has entered into a Memorandum of Understanding (MoU) with the College of Engineering Trivandrum (CET). The collaboration is designed to advance digital infrastructure education and strengthen industry ready skill development for students and faculty at one of Kerala's premier engineering institutions.

As part of the MoU, Bentley Systems and CET will establish a new Centre of Infrastructure Innovation on the CET campus. The centre will become a dedicated space for immersive learning, applied research, and specialized training. Key areas of focus will include sustainable design practices, digital construction workflows, and asset lifecycle management powered by AI and digital twin technologies. Through this initiative, students and faculty will gain hands-on experience with Bentley's leading engineering applications such as MicroStation, OpenRoads, and OpenFlows.

In addition to software access, the partnership will enrich CET's academic programs and broaden practical learning pathways. These enhancements will be supported by the Bentley Education platform, which offers structured learning modules, certifications, and project-based training aligned with global industry benchmarks. Together, these efforts aim to prepare graduates with the technical capabilities and professional skills needed to thrive in India's rapidly transforming infrastructure landscape.

Kamalakannan Thiruvadi, Regional Executive, South Asia, Bentley Systems, said: *"Bentley Systems remains firmly committed to cultivating India's next generation of infrastructure professionals. Our partnership with the College of Engineering Trivandrum reflects our dedication to strengthening ties between industry and academia through advanced digital learning, hands-on experience with emerging technologies, and collaborative research initiatives. Together, we aim to build a strong talent pipeline equipped to drive the future of infrastructure."*

Dr. Suresh K, Principal, College of Engineering, Trivandrum, said: *"The MoU with Bentley Systems marks an important milestone in CET's efforts to strengthen industry-academia collaboration. The Centre of Infrastructure Innovation will provide our students and faculty access to advanced tools and global best practices, thereby enhancing experiential learning, research, and professional readiness in infrastructure engineering."*

The partnership supports India's Viksit Bharat 2047 vision by contributing to the development of a skilled, future-ready workforce capable of advancing major infrastructure programs and driving digital transformation. It also strengthens Bentley's mission to empower the next generation of infrastructure leaders.

Globally, Bentley collaborates with top universities to provide structured learning programs, certifications, and project-based training that prepare students for careers in digital infrastructure. In India, these global frameworks are adapted to local needs through curriculum enhancement, faculty development, and joint research, ensuring learners gain both international insights and region-specific expertise.

About College of Engineering Trivandrum

College of Engineering Trivandrum (CET) is one of Kerala's premier engineering institutions, known for its strong academic tradition, research initiatives, and industry partnerships. CET offers undergraduate, postgraduate, and doctoral programs across multiple engineering disciplines, equipping students with the knowledge and skills necessary to excel in a technology-driven global landscape.

About Bentley Systems

Around the world, infrastructure professionals rely on software from Bentley Systems to help them design, build, and operate better and more resilient infrastructure for transportation, water, energy, cities, and more. Founded in 1984 by engineers for engineers, Bentley is the partner of choice for engineering firms and owner-operators worldwide, with software that spans engineering disciplines, industry sectors, and all phases of the infrastructure lifecycle. Through our digital twin solutions, we help infrastructure professionals unlock the value of their data to transform project delivery and asset performance.
