13 iTwin Ventures
Digital twins are creating exciting new opportunities for independent software vendors, systems integrators, digital integrators, solution providers, and for in-house development teams within engineering firms and owner-operator organizations.

The goal of the iTwin Partner Program is to foster a thriving community of organizations who share our vision of creating an open ecosystem for infrastructure digital twins. We achieve this by supporting the development of applications built on the Bentley iTwin platform, and through enabling organizations that wish to take their digital twin applications to market.
advantages

**innovate**
access tools, technology and support to quickly achieve your goals

**accelerate**
enter an addressable market of the world’s leading design and engineering companies and owner-operators

**scale**
make connections to more data sources and enable digital twins for large-scale infrastructure assets
who the program is for

systems integrators
digital integrators
independent software vendors
developers
success criteria

- defined use case
- developer resources
- digital twin strategy
- executive sponsorship
- go-to-market plan
how to get started

Choose a partnership level:

**Standard**
The Standard level is for organizations that will use the iTwin Platform with limited guidance and promotional support from Bentley.

**Premier**
The Premier level is for organizations that will benefit from enhanced guidance and promotional support from Bentley.

envisioning workshops

objectives

• We aim to engage, educate, and inspire ideation through our envisioning workshops to accelerate your digital twin initiative

• Our team of experts will guide you through a virtual, 2-hour interactive session to explore various use cases and personas using Miro

benefits

• We examine the data gathered through the workshop to help you establish a digital twin hypothesis that aligns with your core objectives

• The result is a workshop summary outline that includes the recommended Bentley iTwin platform modules and developer expertise to achieve your vision
recommended developer experience

- JavaScript or TypeScript
- React developer (or similar) for front end
- Web development
- Node.js backend developer
- Cloud deployment skills (DevOps)
